DETAILED ACTION

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Allowable Subject Matter

Claims 1-48 are allowed.

The following is an examiner's statement of reasons for allowance: Claims 1, 6, 17, 25, 31, and 39 include the limitations that an IR pixel sensor comprises a laterally moving cantilever which includes materials having different coefficients of thermal expansion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suzuki, U. S. Patent No. 6,469,301, describes an IR pixel sensor

comprising a moving cantilever (col. 9, lines 36-46) which includes materials having different coefficients of thermal expansion (col. 9, lines 47-55).
